

Lesson 22

- Textures
- Canvas Resize

1. FIRST TEXTURE

Open a new image

- 400 x 00 Pixels
- Raster Background
- Colour - None (Transparent Ticked)

Click OK

Load any colour into your foreground box & Flood Fill your transparent image

Click on the Texture Icon (blue bricks) OR Effects > Texture Effects > Texture

Click on the Default settings

Locate Mosaic Weave and click on the pattern

Change the Size % to 67

Click OK

Save this as YourName-Lesson22a

2. SECOND TEXTURE

Open a new image

- 400 x 00 Pixels
- Raster Background
- Colour - None (Transparent Ticked)

Click OK

Click on the Foreground box to open the Materials Property window

Click on Texture at the top on the Right

Tick the Add Texture box

Then scroll for Mosaic Weave and click on it.

- Angle - 0
- Scale - 67

Click OK

Flood Fill the transparent Image

Merge all (Flatten)

Save this as YourName-Lesson22b

3. THIRD TEXTURE

Open a new image - Same settings as before

Click OK

Put the choice of colour into your background box - Use the small boxes and arrows to swap so that the colour in the background is a solid colour

Flood Fill with this colour

Click on the Texture Icon and Locate Squares

Click on this texture

- Angle - 0
- Scale - 67

Click OK

Save this as YourName-Lesson22c

4. FOURTH TEXTURE

Open a new image - Same settings as before

Swap the colours back, so that your colour choice is in the foreground box (still with the texture selected in this box)

Locate the Squares texture and Flood Fill the transparent image

Merge all (Flatten)

Save this as YourName-Lesson22d

5. FIFTH TEXTURE

Open a new image - Same settings as before

Go to the textures in the Material Properties Window and UNTICK the Add Texture Box

Flood fill with a pale gradient of your choice and any settings

Locate the jd-texture32 and use the same settings

Click OK

Add a new raster layer

Shift this layer to the bottom

Go to Image > Canvas Size

Put 600 in Width and Height

Click Lock Aspect Ratio

In the Placement Area there are 9 boxes, click on the middle one with the Diamond on it

Click OK

Activate the bottom layer - Raster 2

Go to the Material Properties and Click Texture and Tick the ADD Texture box

Locate the jd-texture38 and use the same settings

Click OK

Flood Fill the bottom Raster 2 with this

Activate Raster 1

Apply a Drop Shadow of

- Vertical - 5
- Horizontal - 5
- Opacity - 65
- Blur - 10
- Colour - Black

Click OK

Reapply the drop shadow with Negative 5 in Vertical and Horizontal

Add Borders

With your dropper tool pick a colour from your gradient and add a border of 4 pixels in this colour

Add a White Border of 4 Pixels

Add a 4 pixel border with your colour choice

Save this as YourName-Lesson22e
